Arizona is the astrotourism capital of America. Its diverse landscape—from the Grand Canyon and ponderosa forests in the north to the Sonoran Desert and “sky islands” in the south—is home to more certified Dark Sky Places than any other U.S. state or country, 16 to be exact. Of the 16, 2 are National Parks: Grand Canyon & Petrified Forest. The IDA (International Dark Sky Association) is based in Arizona.

The entrance to the South Rim of Grand Canyon National Park is located in Tusayan, Arizona. Tusayan is about a 3.5 hour drive from Phoenix. The Grand Canyon National Park provides any length of experience from a few hours to a few days, including motorised tours, scenic drives, hiking trails, guided hiking tours, camping, shopping, white water rafting, dining and lodging. It is recommended to book accommodations well in advance.
